

ARYAN SARODE

Cell: 857-351-6997 | Email: sarode.a@northeastern.edu | LinkedIn: www.linkedin.com/in/sarode-aryan | [GitHub](#)

EDUCATION

Northeastern University, Boston
MS, Computer Science

Sept 2025 – Dec 2027

TECHNICAL SKILLS

- **Languages:** Java, C++, Python, JavaScript, TypeScript, SQL, Bash
- **Frameworks:** Express.js, React, Spring Boot, MVC Architecture
- **Systems & Tools:** Linux, Git, Docker, Checkstyle, CI/CD, Microservices, PostgreSQL, MongoDB
- **Cloud & Infra:** AWS (S3, RDS), REST APIs, System Design
- **CS Fundamentals:** Data Structures & Algorithms, OOP, Distributed Systems, Concurrency

WORK EXPERIENCE

Texas A&M University, Texarkana | Research Intern

Jun 2024 – July 2024

- Developed **ARIMA** and **LSTM** models in Python to forecast electricity consumption trends, winning **1st place** at the university research symposium
- Built optimization models using historical energy data to recommend **cost-effective** appliance usage, directly reducing projected energy costs
- Presented findings to faculty and peer researchers, communicating model trade-offs across accuracy, latency, and interpretability

VidyardhiMitra.org | Web Developer

Jun 2024 – Dec 2024

- Optimized MySQL queries and implemented server-side caching in PHP, reducing average page load time by **30%** across a platform serving **1,000+ users**
- Built and integrated **REST API** endpoints using Node.js, cutting frontend data-fetch latency and improving UI responsiveness
- Developed reusable Angular UI components in an **Agile** team, reducing feature delivery time across 3 product sprints

Outlier.ai | AI Contractor (Freelance)

Jan 2024 – Jun 2024

- Curated and validated large-scale NLP datasets to improve LLM response accuracy across training pipeline
- Delivered labeled datasets meeting quality benchmarks under tight deadlines, supporting model improvement cycles for production LLMs
- Collaborated with distributed QA teams to standardize annotation guidelines, reducing label inconsistency across data batches

Northeastern University | Foreign Credential Evaluator (Part-time)

Sept 2025 - Present

- Processed and validated international academic records using internal data systems, maintaining compliance with university standards
- Collaborated with cross-functional teams to streamline document verification workflows, improving overall turnaround time

PROJECTS

IT Service Management System | Angular, Node.js, PostgreSQL | [Link](#)

- Designed a PostgreSQL schema with 50+ relational tables, triggers, and audit logging, enabling full traceability of incidents, assets, and change requests
- Built REST APIs in Node.js with JWT authentication and role-based access control, securing multi-user access across all service modules
- Implemented service-layer architecture in Angular to decouple business logic from API controllers, reducing codebase coupling across 10+ modules

Personal Email RAG System | Python, LLaMA 3.2, ChromaDB, Gmail API, OAuth2 | [Link](#)

- Built an end-to-end RAG pipeline using sentence-transformers and ChromaDB, enabling natural language Gmail queries with 0.16s average vector retrieval time
- Integrated Llama 3.2 via Ollama with Gmail OAuth2 ingestion, delivering fully local AI inference with zero data leaving the device
- Architected multi-user data isolation at the ChromaDB vector store layer, supporting concurrent user queries across 1,000+ indexed emails

Multi-Mode Calendar Management System | Java, Swing, MVC | [Link](#)

- Architected a Java MVC calendar system supporting GUI, CLI, and batch modes using Command and Controller patterns, reducing UI-logic coupling across 3 execution modes
- Implemented timezone-aware recurring event scheduling with CSV/ICS import-export in Java, supporting real-world calendar interoperability
- Enforced code quality using JUnit, Checkstyle, and Gradle pipelines, achieving full test coverage across core scheduling and parsing logic.
